

# European Union Sustainable Energy Week

## EU Sustainable Energy Week 2012 - get ready

It's time to get into the starting block for next year's EU Sustainable Energy Week (EUSEW), Europe's key event for a more sustainable energy future.

Between **18 and 22 June 2012** hundreds of events organised in all parts of Europe will show, promote, discuss and celebrate energy efficiency and renewable energy - and you can be a part of it.

## Be a part of it - organise an Energy Day in your city or region

Wherever you are in Europe, join the EUSEW 2012 and **organise an Energy Day in your city, town or region between 18 and 22 June 2012** (weekends before and after accepted).

Energy days can be any event to promote renewable energy or energy efficiency - from exhibitions, conferences, online events, and performances to guided tours, open door days, workshops, media campaigns, concerts and much more....

From November onwards you can join other organisers in uploading your Energy Day on the EUSEW website. The 2011 EUSEW involved 720 events in 43 countries and attracted more than 150,000 participants. Let's try to break this record next year!

Stay tuned and join the discussion on our [Facebook page](#).

## The EUSEW 2012 in Brussels - inspiring, informing, sparking change

The European Institutions, associates of the Sustainable Energy Europe Campaign, and other important players in the field will organise a **series of events in Brussels** during the EUSEW.

These will include a **3-day policy conference** organised by the European Commission from **19 to 21 June 2012**.

For the journalists amongst you we will develop a dedicated **media highlights programme** in the near future.

## Participate to the Sustainable Energy Europe Awards Competition 2012

For those amongst you, who manage a project with outstanding results in sustainable energy, why not competing for a European Award? The annual awards are an integral part of the Sustainable Energy Europe Campaign and provide an invaluable opportunity to highlight the successes of the most outstanding, ambitious and innovative projects in sustainable energy. The European Commission will reward best-in-class initiatives in the fields of renewable energy and energy efficiency.

**More information on Awards categories, eligibility criteria and participation procedures will soon be available at [www.eusew.eu](http://www.eusew.eu)**

## Need more details or help?

We will add all news and updates on the EUSEW **2012** on the [EUSEW website](#) as and when they become available.

For any immediate questions, do not hesitate to contact the EUSEW Secretariat on [eusew@sustenergy.org](mailto:eusew@sustenergy.org).
